609

Campaign Responses by Marketing Channel.

INSIGHT 1 (Marketing Funnel): Total marketing spend of $12,359,497.34 across 2,240 campaign touches generated 609 responses (27.2% response rate), resulting in a high blended cost of $20,294.74 per campaign response. Partner Referral and Paid Social drive the highest response volume while Email and Direct Mail lag behind. ACTION: Reallocate 25% of underperforming Direct Mail and Email budget into Partner Referral and Paid Social campaigns to lower cost-per-response below $15,000.

INSIGHT 2 (Sales Pipeline): NovaTech achieved a 63.1% closed-deal win rate (315 Won vs. 184 Lost across 499 total deals) generating $707,201 in closed-won revenue with an average sales cycle of 66.76 days. However, 184 opportunities were lost primarily due to No Decision, Poor Product Fit, and Competitor/Budget objections. ACTION: Implement mandatory mid-cycle ROI business-case reviews at Day 35 for Enterprise and Large deals to reduce 'No Decision' and 'Budget Constraints' losses by 20% next quarter.

Cross-Dataset: Distinct Support Tickets by CRM Segment

INSIGHT 3 (Customer Health): High and Critical priority tickets account for 15.0% of total volume (450 of 3,000 tickets: 400 high, 50 critical), while 59 tickets (2.0%) remain unresolved across an average resolution time of 1.95 days. High-severity ticket spikes in Enterprise and Large accounts directly threaten renewal expansion. ACTION: Route all 50 critical and 59 open tickets to a dedicated Tier-3 escalation queue and trigger automated CSM alerts for any account exceeding 3 high-priority tickets per quarter.
